

Aluminium Cleaner

(Formula Ref: 1220604)

DESCRIPTION

- Mineral acid blended Aluminium Cleaner specially developed for the cleaning of aluminium fabrications which tend to become dull and pitted in service

SPECIAL FEATURES

- Does not contain abrasives and correctly used will not affect paintwork

SURFACE PREPARATION

- Remove any loose debris by brushing or wiping

APPLICATION

- Spray or Brush

METHOD OF USE

- Dilute before use: 1:3 for heavily corroded parts, 1:1.5 for medium corrosion and 1:1.25 for regular maintenance. Spray or brush onto surface, starting at the bottom and working upwards to avoid streaking. Agitate and brush out evenly. Rinse off well with clean water.

SPECIAL PRECAUTIONS

- CAUTION: contains Hydrofluoric acid (<5%). Do not allow to come into direct contact with skin or eyes. Avoid breathing mist or spray. Hydrofluoric antidote gel (calcium gluconate) should always be available and a plentiful supply of clean water.
- Refer to Material Safety Data Sheet before use.
