

NEOLITH

828 Gel. PC SAFE.

NEOLITH 828 PC SAFE is a specially formulated graffiti remover gel for use on polycarbonate and plastic. It will not cause damage associated with more traditional removers. It is particularly effective for removing graffiti caused by spray paint.

NEOLITH 828 PC SAFE will remove aerosol paint, felt tip marker and a variety of paint and ink.

NEOLITH 828 PC SAFE is effective on most types of surfaces, including brick and masonry. Always check a small area for compatibility.

ADVANTAGES.

- . Non-hazardous under current C.H.I.P. regulations.
- . Low odour for operator comfort and safety.
- . Low rate of evaporation leading to low product loss.
- . Non-chlorinated, giving a safe, environmentally responsible product.
- . High flash point for safety.
- . Easy to use gel leading to minimal run off and waste.
- . Excellent rinse ability with water.

INSTRUCTIONS.

Apply to graffiti and leave for a short time. Agitate and wipe off with a cloth and rinse with water.

PACK SIZE.
